## Luxsmile Teeth Whitening Toner —V34 Colour Corrector Serum

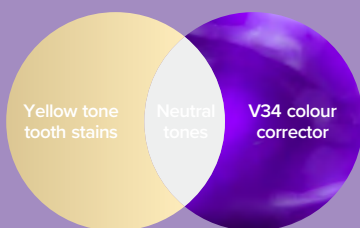

Give You a Natural Brighter Teeth in 1 Week

### What is v34?

V34 utilizes color theory technology to balance yellow tones in teeth, enhancing brightness, ideal for daily use or before special events.

- ✓ Instantly cancels yellow undertones for a whiter smile
- ✓ Non-invasive, simply brush on like regular toothpaste
- ✓ Balances warm and cool tones to reveal your brightest white smile
- ✓ No harsh peroxides, safe for daily use

### Utilises colour correcting technology

Colour correction all starts with the colour wheel, where purple and yellow are complementary colours opposite each other on the colour wheel. Applying purple onto your teeth neutralises yellow undertones by cancelling them, giving your teeth a perceptively brighter shade of white.
